

# Grant's Dissection Videos

**Grant's Dissection Videos** are a collection of 77 high-resolution videos, totaling more than 14 hours, that demonstrate the Grant's method of cadaver dissection sequences, as described in the renowned *Grant's Dissector* text.

Organized by body region, each video includes narration by Dr. Alan Detton, on-screen labeling and text showing students:

- What they are expected to achieve in lab
- The steps required for each dissection
- The information they need to learn for practical exams

*Designed to support and enhance anatomy education across healthcare programs*

The Upper Limb: FLEXOR REGION OF THE FOREARM

The Thorax: EXTERNAL FEATURES OF THE HEART

The Head and Neck: Gross Anatomy of the Brain

The Thorax: POSTERIOR MEDIASTINUM

- Demonstrates cadaver dissection sequences using real anatomic specimens
- 77 videos with over 14 hours of content
- Organized by body region, covering:
  - Back
  - Upper Limb
  - Thorax
  - Abdomen
  - Pelvis and Perineum
  - Lower Limb
  - Head and Neck
- Contains clear narration, on-screen labeling and text
- Can be used with or without a dissection lab
- Accessible online for student and faculty use

## Why Grant's Dissection Videos?

- **Ideal for preparation and review** in the gross anatomy lab environment
- **Real cadaver specimens** provide the anatomical detail students need to recognize important relationships revealed through dissection
- **Shows students the proper steps** for dissections and the information they need to learn for practical exams
- **Enables independent learning** and frequent viewing by students
- **Greatly improves student confidence** and makes their use of lab time more efficient
- **Benefits students** that do not have access to a dissection lab, or have limited time or access
- **When combining Grant's resources** – including *Grant's Atlas of Anatomy* and *Grant's Dissector* – both faculty and students have a consistent presentation and sequence that will allow for a deeper and more meaningful understanding of anatomy
